Imagined to inspire extraordinary people who see things differently, seek innovation and bespoke experience.

HiCan is a contemporary and technological cocoon, a private sanctuary where you can enjoy a new concept of lifestyle and comfort.
A perfect blend of design and technology to make life experience more authentic.
Designer: Edoardo Carlino

Award winning designer. Founder & CEO of Think Future Design.

While designing HiCan, I was thinking what kind of experience we could create in order to enrich people’s lives and this experience is the living force behind the design of this product...

- Smart alarm

Add +

HEALTH:

- Sleep monitoring and analyzing
- Air quality, temperature and humidity monitoring
- Noise and light monitoring
- Occupancy detection

A new interpretation of the classic canopy to create an enveloping personal space around you and transform the traditional experience of rest in a moment of higher and authentic well-being with fragrances, smart lighting, and relaxing music, enhanced by its unique design for a theatre of emotions and being surrounded by pure high-quality sounds and images.

With the health options all you need is to just lay down in the smart bed and check your sleep pattern every morning with the companion App. More than analyzing sleep you can monitor temperature, air quality and noise level for a complete check on your health.
